It's the breast milk that is considered the best baby food for infants up to 4 months of age. Mothers also use infant formula to feed the baby. You will need to feed 8-10 times a day depending on your choice of meal – whether you are breastfeeding or formula feeding. In case you are using the latter, the baby has to be fed every 3-4 hours. 4 to 6 Months. When the baby crosses the milestone of 4 months, the time for solid food slowly begins.

'Milk does not provide enough nutrients for your baby, which is why you need food.' From the age of six months, your baby needs 7.8mg of iron. 'While formula is fortified with nutrients, including iron, you should also ensure that you wean him using iron-rich foods such as meat, dark poultry meat, beans, pulses and dark green leafy vegetables,' says Jo.

Healthy baby food is a topic I feel very strongly about and will definitely step onto the soapbox for! Like many aspects of life, convenience doesn't equal quality (although I argue homemade baby food can be very convenient if you take a simple approach) and many of the current pre-made baby food options are definitely NOT the best first foods for babies!
