Environmental Management, with few exceptions, is not taught in colleges, universities, technical and management institutions. The result is that the students of these institutions lack knowledge and sensitisation to environmental issues. They lack the awareness of environmental consequences of human actions. To fill this void, Environmental Management is timely.

book provides background material to various environmental problems. It surveys a range of topics from sustainable development and ecological imperatives to strategies for managing environmental issues. The problem of pollution, waste management, biological diversity and forest management have been analysed in the light of laws and international conventions and treaties. The book brings out the realities about the damage being inflicted on the environment and our exploitive attitude to nature. It concludes with discussion and debate about

values in nature and touches upon the subject of metamorphosis of the whole trajectory of attitudes in modern societies.

The subject of Environmental Studies has only recently been introduced in curricula of schools and colleges, largely due to the urgency associated with the subject, especially after the Bhopal Union Carbide gas leak disaster, growing awareness of the effects of global warming, deforestation, air, water and soil pollution, and other related matters. Written specifically for

# File Type PDF Environmental

Undergraduate students, this textbook, while complying strictly with the UGC syllabus, gives the statutory backdrop for attaining a proper perspective of the subject. All the major environmental issues, whether national or international, are discussed. The book covers the cumulative effects of exploitation of the Earth's resources whether forest, marine, riverine, or mineral-based and lays the foundations of effective environmental management. In stressing on the inter-connectivity between all living things, this book joins the ranks of a larger

body of literature typified by Rachel Carson's book Silent Spring that highlights the role of individuals and responsible Corporates in saving the Earth and its inhabitants. Students from diverse backgrounds Arts, Science, and Humanities would be able to grasp the environmental concepts through study of this book.

This volume commemorates the Golden Jubilee Year of the establishment of Kirorimal College. This prestigious institution was honoured by the gracious presence of the First President of India, Dr. Rajindra Prasad who laid

the foundation of the college building. This commemorative volume focuses attention on the growing awareness about plant ecology and environment biology. The different contributions present an up-to-date, detailed and balanced overview of the current knowledge within specific topics. Man has interacted with nature in various ways since the dawn of civilization. Primitive societies ensured that a proper balance was maintained. The situation has changed by the various developmental activities of man. We are losing our natural resources,

biodiversity, genetic diversity, and are unable to manage nature. The consequences are becoming apparent in the form of drought, floods, depletion of the ozone layer, global warming, climate change, melting of snow, rising of water levels in coastal areas, desertification, etc. These concern ecologists/ environmentalists and should receive adequate attention by students who study ecology. In this volume, emphasis has been laid on areas such as Climate Change, Environmental Laws, Biodiversity Act, Intellectual Property Rights, Mineral Industry and

2006.

A number of arguments are made by an international group of authors in this though provoking book about an understudied and socially important context. A future in which financial wealth transfers across the North-South divide from richer to poorer countries is far from sufficient for the relief of poverty and the pursuit of sustainability. Caution must be taken when growth is achieved through the liquidation of the natural wealth of poorer nations, in order to maintain a global

economic status quo. Neither poverty reduction nor sustainability will ultimately be achieved. The financial collapse and social upheaval that might result will make the most recent economic downturn look trivial by comparison. What is more urgently needed instead, as argued in this book, is collaboration for sustainability and innovation in the global South, especially building on models originally developed in the South that are transferable to the North. In pursuit of a sustainable and more equitable future, the book examines such topics as

stories and have not been  
told and need greater  
visibility. The book  
contributes in a
