Reasoning (Crash

Course) ~~Mathematical~~

~~Reasoning Solutions~~

Solution: When  $p$  is true and  $q$  is false, then  $p \rightarrow q$  is true,  $q \rightarrow p$  is true and  $p \rightarrow (\neg q)$  is true.

(Therefore, both  $p$  and

# Where To Download

$\neg q$  are true) Here,  $p \wedge q$  is not true as a true statement cannot imply a false statement.

Question 4:  $\sim (p \wedge q) \wedge (\sim p \wedge q)$  is equivalent to \_\_\_\_\_.
