Temple of the Cosmos is a profound exploration of an ancient consciousness more in tune with the rhythms of the earth, more open to the internal dimensions of time and space, less cut off from the sources of life. The author argues that the true source of Western civilization lies just beyond the horizon of Greek rationality and Judeo-Christian monotheism in the blazing light of Egyptian culture, and that we still have a good deal to learn from this ancient civilization.

Temple of the Cosmos - Books - Inner Traditions

The temple is considered the center of cosmos and in itself, a microcosmos. In Egypt the temple contained within its sacred precincts a representation of the original primeval hillock that emerges from the cosmic waters. In short, the temple was considered deity's cosmic domain. This concept is represented even in the design of the temples.

Temple and Cosmos is a collection of talks, published essays, and previously unpublished manuscripts of Hugh Nibley, volume 12 of his Collected Works. The thematic combination of temple and onological themes works pretty well because Nibley understands the temple to be metaphor for man's place in the physical

and historical universe.

In their highly selective and literal reading of Scripture, creationists champion a rigidly reductionistic view of creation in their fight against "soulless scientism." Conversely, many scientists find faith in God to be a dangerous impediment in the empirical quest for knowledge. As a result of this ongoing debate, many people of faith feel forced to choose between evolution and the Bible's story of creation. But, as William Brown asks, which biblical creation story are we talking about? Brown shows that, through a close reading of biblical texts, no fewer than seven different biblical perspectives on creation can be identified. By examining these perspectives, Brown illuminates both connections and conflicts between the ancient creation traditions and the natural sciences, arguing for a new way of reading the Bible in light of current scientific knowledge and with consideration of the needs of the environment. In Brown's argument, both scientific inquiry and theological reflection are driven by a sense of wonder, which, in his words, "unites the scientist and the psalmist." Brown's own wonder at the beauty and complexity of the created world is evident throughout this intelligent, well-written, and inspirational book.

Despite the prominence of ancient temples in the landscape of Egypt, books about them are surprisingly rare; this new and essential publication from a prominent Czech scholar answers the need for a study that goes beyond temple architecture to examine the spiritual, economic and political aspects of these specific institutions and the dominant roles they played. Miroslav Verner presents a deeper and more complex study of major ancient Egyptian religious centers, their principal temples, their rise and

decline, their religious doctrines, cults, rituals, feasts, and mysteries. Also discussed are the various categories of priests, the organization of the priesthood, and its daily services and customs. Each chapter offers the reader essential and up-to-date information about temple complexes and the history of their archaeological exploration, in the context of the spiritual dimension and cultural legacy of ancient Egypt.

This is the fourth book in this series that began with an in-depth look at how God views details, communicates with this world, and decides what process to use. Of course this series of books looked at aspects recorded in scripture about the Tabernacle. How the materials were collected, specific design details, who did the work, and how the Tabernacle was constructed. Much of that information is found in dozens, maybe hundreds of other books about the Tabernacle. But there are details setting this book apart from every other book written about the Tabernacle. This book takes a verse by verse, story by story, chapter by chapter look at the Tabernacle. In other words, this book presents a picture of the Tabernacle from God's point of view. Which the beginning of this series pointed out, is much different than any human perspective.

This volume contains essays by some of the leading scholars in the study of the Jewish religious ideas in the Second Temple period, that led up to the development of early forms of Rabbinic Judaism and Christianity. Close attention is paid to the cosmological ideas to be found in the Ancient Near East and in the Hebrew Bible and to the manner in which the translators of the Hebrew Bible into Greek reflected the creativity with which Judaism engaged Hellenistic ideas about the cosmos and the creation. The concepts of heaven and divine power, human mortality, the forces of nature, combat myths, and the philosophy of wisdom, as they occur in 2 Maccabees, Ben Sira, Wisdom of Solomon and Tobit, are carefully analysed and compared with Greek and Roman world-views. There are also critical examinations of Dead Sea scroll texts, early Jewish prayers and Hebrew liturgical poetry and how they these adopt, adapt and alter earlier ideas. The editors have included appreciations of two major figures who played important roles in the study of the Second Temple period and in the history and development of the ISDCL, namely, Otto Kaiser and Alexander Di Lella, who died recently and are greatly missed by those in the field.

The scenes of the foundation ceremony from temples of the Ptolemaic Period (305/4-30 BCE) provide the most insight into the nature of this ancient Egyptian rite. In these scenes, the Egyptian king is depicted performing the acts associated with the various stages that took place at the founding of the temple. As the protagonist within these scenes, the king is depicted as being directly responsible for constructing the temple. This thesis will argue that when one combines the king, in his role as temple-builder, with the idea that the Egyptian temple represented the created universe or cosmos, the ruler is not only building a temple but also constructing the cosmos. With that in mind, the scenes of the foundation ceremony place the king among the gods, even so far as being considered the creator god.

Eternal Egypt: Ancient Rituals for the Modern World is the first comprehensive collection of important temple rituals performed throughout Egypt during the time of the pharaohs. The author presents seven key rites from official temple records and ancient esoteric texts for personal or group use. This guidebook also: - presents rituals in a form designed to assist initiates in restoring the ancient rites of Egypt; - provides for modern usage, key ritual texts coming solely from authenticated ancient sources; - contains easy to follow commentaries and background information on each ritual, including symbolism and mythology not previously available in one book; - gives text with commentary for the "Opening of the Mouth" ceremony; - offers practical information for conducting these rituals in today's world. Formerly only available to the scholar and professional Egyptologist, these ritual texts reveal the deeply spiritual understanding of humanity's relationship to divinity that characterized the ancient Egyptian sense of the sacred. This is a practical intermediate level text for those wishing to worship the great deities of ancient Egypt in as authentic a manner as possible, and by so doing tap into the great spiritual heritage that sustained Egyptian culture for over three thousand years.
